Prowise Screen Control

Easily manage all your touchscreens within the school or organisation remotely, at the touch of just one button. With Prowise Screen Control, you save valuable time by managing all interactive whiteboards directly from your laptop. Group your interactive whiteboards by organisation, location or group and easily adjust settings for one or more touchscreens.

100% in control

Prowise Screen Control is an innovative MDM solution to make the management of Prowise touchscreens even more efficient. Monitor and manage all interactive whiteboards within your school or organisation from a user-friendly dashboard.

Remote management

Adjust settings without physically being present

Remote control

Watch in real time by taking over the touchscreen

Install apps

Install and manage apps on your touchscreens

Narrowcasting

Push URLs in 'kiosk mode' to present information

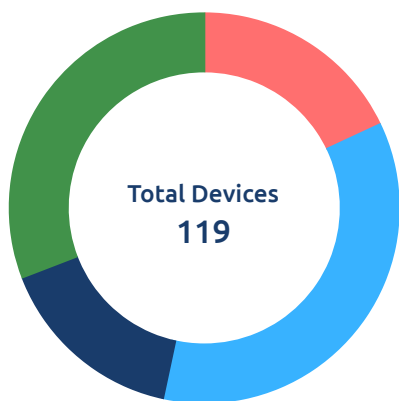

Security Settings

Enable or disable features, push passwords and block URLs

Power management

Save power by setting the right power mode and plan start-up and shut-down times

Groups

● Group 1/2

● Group 3/4

● Group 5/6

● Group 7/8

● Others

Flexible group management

In Prowise Screen Control, you easily create groups to manage touchscreens by organisation, location, class or another specific group. Of course, you can also choose to adjust settings at the touchscreen level. The combination of group and individual management options ensures maximum control and customisation within your school or organisation.

World-class safety

Our commitment to security is confirmed by the German Federal Office for Information Security (BSI), the global authority on cyber security. The development of Prowise Screen Control has been awarded a prestigious IT-Grundschutz certification, meaning it meets the highest European security requirements. You can confidently use Prowise Screen Control at your school!

Developed entirely by Prowise

European in-house data centres and servers

Multi-layer security with hardware and software firewalls

Adaptive DDoS protection

Independent audits and white hat hackers

Function overview
